

吴阶平医学基金会

April 29, 2015

Dear UAA executives,

The aims of Wu Jieping Medical Foundation are to collect funds collaborating with those who give concerns about the development of medicine and health to award or sponsor academic programs in order to promote Prof. Wu's professional spirit and ethics as well as the development of medicine and health. The foundation has been making continuous efforts to promote doctors' expertise, support scientific studies and academic communication, organize continuing education and specialty trainings, organize health public activities and science popularization education programs, establish special funds collaborating with pharmaceutical companies to carry out trainings of clinical trials and applications on specific drugs, and take part in and support development of traditional Chinese medicine since its establishment in 1995.

The 4th International Forum on Frontiers in Urology (IFFU), held from 23 to 26 April 2015 in Beijing, has been successfully concluded. During the preparatory stage the organizing committee received selfless help and great supports from the UAA. Prof. Allen Chiu gave impressive presentations in the scientific programme of the 4th IFFU. Hereby we would like to extend our sincere gratitude to him. Dr. Badrulhisham Bahadzor from Malaysia, recommended by the UAA won the second prize at the 4th International Simulation Competition for Young Urologists.

We look forward to close collaboration with UAA and other international organizations on the 5th IFFU, which is scheduled to be held from 21 to 24 April 2016. We will offer details of the 5th IFFU no later than October 15 after discussions with international organizations.

We would like to express our gratefulness to the UAA again for the help and supports. UAA is the one of the closest partners of Wu Jieping Medical Foundation. We are willing to do more things to develop Chinese urology by working with UAA.

Sincerely yours

Wu Jieping Medical Foundation
